Summary

Hello! I'm a Software Engineer who was born in Florida, but raised in code. I've been developing programs since I was 14. At 16 I was contacted by a Google recruiter, at the time I was too young, but it sealed my fate as a Developer. I attended a couple colleges, but found myself being bored and limited. Eventually, I decided to take a risk and started my own software company. Today, Chance Software LLC runs largely on autopilot, allowing me to seek new ways to further myself in the world of tech

Experience

Chance Software LLC	December 2021 - Present
Founder	Virginia Beach, VA
https://chancesoftwarellc.com	

Education

Florida South Western	September 2019 - May 2020
Computer Science	Dual Enrollment
University of Akron	January 2021 - July 2021
Software Development	Undergraduate

Projects

Chance Tracker	November 2022 - Present
GPS Tracking for Law Enforcement	
https://chancetracker.com	

My first professional project, and the perfect learning experience to grow as a developer. Consisting of a native Android & IOS app, and a web portal. I gained hands on experience with Firebase, NextJS, Kotlin, embedded programming, and Windows Development. I also managed a team of developers who designed the IOS portion using Swift

Blazed Cloud	October 2023 - Present
Simple & Private File Backups	
https://blazedcloud.com	

My second largest project I've ever built. Using my experience from Chance Tracker, I wanted to change my tech stack to be easier to maintain with scale. Blazed Cloud was developed with SvelteKit, Flutter and PocketBase.

Volunteering

Lee County Sheriff's Office	July 2019 - June 2020
Intern Programmer	Fort Myers, FL

While in my Senior year of high school, I fixed bugs and added quite a number of features to Agency software using Java/Spring and PHP. Having a direct impact on productivity for Law Enforcement Officers. Unfortunately my time here was cut short due to Covid-19
